

JARUS External Consultation - COMMENT/REVIEW

Ref. document: WG-SRM "SORA Main Body"

#	From	General Comment (Optional)	Item	Page	Line	Current Text	Comment	Proposed Text (Required)
1	European Model Flying Union	SORA cannot reasonably be used to assess the operations of all model aircraft flown in a country to support an Article 16 auhtorisation.	1.2 Purpose of the document	16	254	Additional text needed in additional pragraph	SORA cannot reasonably be used for assessing the operations of all the members of national model aircraft flying clubs/associations as part of an Article 16 authorisation application. The geographical spread of the members and their operations throughout a contry, the different times / dates of the operations and the wide variery of aircraft types operated would be impossible to assess in a single SORA. A SORA for every combination of potential operations would be impractical to carry out.	The SORA is not intended as an acceptable means to evaluate the safety risks of model aircraft operations conducted in the framework of model aircraft clubs and associations under an authorisation in accordance with Article 16.
